

The FCC is about to make a tragic mistake by reducing the variety of media programming available to the American public. We will particularly suffer a reduction in the type and variety of news and information programming. Please reconsider your proposed action and leave the rules in their present form.

I dont want the media to be owned by one or two "Companies"

I mean Look at whats going on now.. How many Media news givers have REPORTED on the FCC voting this month? See why we need the Rules to be untouched :)
